

DETACHABLE BOX AND ASSEMBLY

ABSTRACT OF THE DISCLOSURE

5 A detachable box assembly designed to allow for the quick-release of a box from a box receiving surface. The assembly consists of two slidably secured attachment plates configured to be attached to the base of a box and the support of the receiving surface post. The plates are configured for attaching the box to the box receiving surface. The assembly further comprises a locking mechanism configured to prevent the removal of the attachment plates and thereby secure the box to the box receiving surface.
